VECTOR ART created in Adobe Illustrator is preferred for all types of PROTEAM Custom Logos. AI, EPS, or PDF format.

If vector art cannot be provided, please provide artwork at highest resolution possible - 300 dpi is ideal.

Important Note: A scanned image (e.g. jpg, gif, bmp, tiff, psd, pdf) or art created in a photo/paint program is not vector art. In addition, placing, linking, embedding, or copying these images into a drawing program does not convert them into vector art.

ADDITIONAL INFORMATION:

EMBOSSED LOGOS: The cost for embossed logos is based on the number of patent vinyls used to create the logo. You can decrease the number of patent vinyl colors used by using the upholstery vinyl as a color in your logo. The sample below shows a logo using three patent vinyl colors; and then the same logo using the upholstery vinyl as a logo color and only two patent vinyl colors.
